The light that caresses our surroundings.

The careful natural environment, comes together in a different, and unique architecture with its own identity.

An architecture inspired by nature, where we can find white river stones, sculptural forms representing trees such as the carob tree, corten steel bridges, wood...

Where nature and
art are born.

Dive into sustainable gastronomy.

Based on respect for nature, a different way of understanding cuisine was born: gastroacuaponía.

An activity that integrates and merges gastronomy with aquaponics found at Higueroón. The idea comes from our Chef Diego Gallegos, by using sustainable facilities, and a model of integrated fish and vegetable farming to obtain a permanent supply, controlling times, sizes and the quality of the species, depending on the season.

Robin Chiang

The innovative architectural design of the development is a work of art by renowned North American architect and University of Berkeley professor Robin Chiang.

With more than 30 years of experience in architecture Robin has achieved more than 100 projects involved in the planning of new towns and urban infill in the Bay Area as well as East Asia, Western and Eastern Europe and the Middle East. Responsible of providing design review services to the San Francisco International Airport (SFO), the Oakland International Airport and Dubai International Airport expansion.

His projects have won a number of design awards such as BART Warm Springs Station honored with the California Transportation Foundation (CTF) Project of the Year award. His community service has resulted in mentions and honors from distinguished

cities and institutes: American Institute of Architects for urban design, Beautification award San Francisco, NASA Aames Research Laboratory among others.

We had previously counted on Robin for the creation of our 5* Hotel Higuera, where we placed our trust in him and in his ideas and concepts. When we decided to create this development, we thought of him again as a designer and today, through this new project, we reveal to you the common thread thus created which has continued with this project through the materials, the architectural and landscape design; in short, the unique concept that sets us apart from the rest. The interior design and furnishing follows Robin reflection of the natural environment counting on recognized italian brand: B&B Italia, Flos, Ligne Roset, Roberti, Bonaldo y Vondom along with others.

The
master lines
of nature...

converted to
architecture.

The designer of the project takes the nature and landscape of the Mediterranean environment as a reference to integrate the homes with an avant-garde, organic and authentic style. The fruit of this essence is born from the Mediterranean tree, like the centuries old carob trees that surround the environment.

The tree is the root that circles each of the houses, connecting them by means of a sculptural bridge of corten steel to embrace nature. The bridge culminates the treetops that shape the structure of this development.

The
landscape
is a body

This development lives thanks to the environment that surrounds it. An authentic wonder of Mediterranean nature with which to share life and moments in your home.

Our project has been designed to respect the centennial carob trees and the existing nature that embellish the place and denotes tranquillity, nature, and history in the environment.

A joy for the senses with the sound of the birds as they stroll and delight in the fragrance of nature.

The project

Where architecture and nature merge in a dream project in southern Spain: 6 villas and 26 apartments with views of the Mediterranean Sea, surrounded by native vegetation.

This development is designed and inspired through our Hotel architecture, following the avant-garde essence and using sustainable materials.

The masterpiece of nature.

A unique architecture with its own identity, as well as an intelligent design and materials of the highest sustainable qualities, are the premises of this project.

In keeping with the movement of nature that surrounds them, the apartments take a hexagonal structure, merging with the environment.

The spacious properties are divided into two bedrooms, with an elongated sliding door to give residents the choice of dividing the apartments into two parts. The living room and bedrooms have large windows letting in natural light, merging with the wooden that features within the interiors.

The Italian kitchen is characterized by a long island of marble carefully connecting with the warmth of the design. The outdoor terrace brings in Mediterranean fragrances, as the interior and exterior blend together becoming one.

Every corner of your home will have a scent specially chosen by you.

breath of fresh air.

Maximum intimacy embraced by natural vegetation for each apartment to enjoy and relax in the private jacuzzi, while admiring views of the Mediterranean Sea and nature. The penthouses, follow the architectural design in the solariums, with pointed hexagonal shaped roofs to provide shade in the outdoor dining area blending in with the surrounding trees. Breathe in the fresh indigenous vegetation of the area while taking a relaxing swim in the private pool at the solarium.

Crafted by nature.

The design of the project takes nature and landscape as a reference, integrating it into the homes. Welcome to the villas, a natural scenery, which gives life to the architectural project from the first moment.

A natural path through the trunks of the trees to reach the treetops entering your home. The villas consist of four large bedrooms, on three floors, which can be accessed with the private elevator. Entering the living room you will find harmony and warmth from the wood that runs throughout the floor, up to the high ceilings. Admire the works of art, the sculptural fire-place of marble that divides the room, and the high windows letting in natural light and serving as a viewpoint towards nature. The villas have private cinema room to enjoy leisure time with friends and family.

The trees that surround the exclusive Villas transfer the Mediterranean fragrances to the interior of the homes, such as thyme, or rosemary. The natural division of the vegetation in each one of them allows the most

intimate atmosphere of the home to be enjoyed. Breathe, and relax from the infinity pool where you can dive, while admiring exceptional views of the centuries-old carob trees and the Mediterranean Sea.

Immerse yourself into the pleasure of wellbeing, relaxation, and deep tranquillity in the private spa that awaits in your villa. Breathe in the wooden atmosphere, relax in the warm jacuzzi and sauna that will heighten your senses. Admire the outdoor nature from the comfort of the sunbeds, while the blue light from the pool dives in.

Our commitment to nature is everywhere using sustainable and natural materials such as wood, white river stones, or minerals. A design that allows full advantage to be taken of the panoramic views of the sea and its orange sunsets.

Details make
the difference.

We provide harmony in the interior of the rooms by bringing natural materials from the exterior to the interior design.

Onix, the most natural mineral.

A soft and delicate hardness that is characterized by the translucent natural stone that divides the different areas of the main room.

Making living sustainable.

A tasteful journey with Chef Diego Gallegos.

We share with you the most sustainable gastronomy of a single mouthful.

Awarded with a Michelin Star and a Green Star, our Chef Diego Gallegos, known as the chef of caviar, is at your disposal to taste its delicacies from the R&D reserved for Higuerón Residences Members.

The star ingredients river fish and caviar, come from self-cultivation, in the aquifer and the natural lake in the community of this development itself, in which to find river fish with maximum freshness and flavour.

The aquifer continues the architectural design of the project, following the corten steel, the gabion wall and the natural elements that surround the space. This design will be built exclusively for this development.
